Muhammad Atif Shahzad

PHP Laravel Developer | 2+ Years of Experience

Linkedin: https://www.linkedin.com/in/code-matif/   -   **WhatsApp:** +923098101806

Email: code.matif@gmail.com

Backend developer with over **2** years of experience specializing in **PHP** and **Laravel**. I have worked on scalable and secure applications, including AI-driven platforms, eCommerce systems, and real estate solutions. My focus is on crafting efficient backend systems and integrating APIs to enhance functionality. I also have hands-on experience with technologies like **Python**, **Django**, and **Node.js**, adding versatility to my skillset.

Skills & Tools

Languages: PHP, HTML, JavaScript, SQL, Python(Intermediate), CSS(Basic), C++(Basic), Java(Basic)

Frameworks & Libraries: Laravel, jQuery, Bootstrap,Tailwind CSS, Django (Intermediate), Flask (Intermediate), Node.js, Express.js, React.js (Basic), Vue.js (Basic).

Databases: MySQL, MongoDB

Tools: Git, GitHub, Slack, Trello, Jira

Experience

(CodesterTech)

PHP Laravel Developer
January 2023 - Present

As a backend developer at **CodesterTech**, I contributed to diverse projects leveraging **PHP** and **Laravel**.

- **Designed and optimized backend systems**, improving application performance and scalability.
- **Developed and integrated RESTful APIs** to facilitate seamless communication between services.
- **Crafted efficient database schemas** and implemented query optimization for large-scale data operations.
- **Streamlined development workflows**, reducing project delivery timelines and enhancing team productivity.

(CodesterTech)

Internship Trainee
August 2022 – January 2023

During my internship at **CodesterTech**, I gained hands-on experience by working on real-world projects while learning and applying new technologies:

- **Learned and implemented** technologies like React.js and Laravel, alongside over 20 other technical skills.
- **Collaborated with senior developers** on real-world projects to gain hands-on experience.
- **Assisted in debugging and optimizing** application functionalities.

Projects

3D Model Tour:

Backend Developer (PHP, Laravel)

- Integrated advanced AI tools such as Spacely AI, OpenAI, and LangChain to create a dynamic 3D configurator.
- Developed features for real-time 3D model customization, material selection, and user-uploaded textures.
- Designed dashboards for Buyer, Builder And Admin to manage configurations and streamline administrator interactions.

Technologies Used: PHP, HTML, CSS, JavaScript, JQuery, MySQL

Link: https://3dmodeltour.com/

X Builder:

Backend Developer (PHP, Laravel)

- Built a feature for generating product pages from URLs of Amazon, Alibaba, AliExpress, and Shopify using AI.
- Added functionality to create SEO-optimized blogs from URLs, ideas, and custom inputs using AI.
- Integrated Shopify for importing custom themes, products, and blogs, enabling dynamic content management.

Technologies Used: PHP, HTML, CSS, jQuery, JavaScript, MySQL, Python, Flask, LangChain

Link: https://dev.xbuilder.ai/
